

# Documentation Parallel Working Session

1. Discussed new documentation
2. Agreed to maintain public documentation only for current release
3. Git merge request will publish “dev” version of the commit
  - html and pdf
  - Will try to link into drupal so visible through doc-wg page
4. Formatting: contrast in colours could be improved (e.g. blue text)
5. Alternative formats: epub, mobi.... not clear it's necessary and might create extra work (e.g. we use raw-latex for formulae)
  - Will be investigated but not considered a priority
6. Physics lists:
  - Dennis and Marc agreed to investigate/improve the basic concept/guide
  - Relationship between applicability and actual physics lists discussed
  - Naming scheme – could be revised?
7. Videos – Laurent presented and lead discussion

**Laurent Garnier and Alexander Howard (remote)**

# Videos

- Progress made on having a repository visible through drupal
- Videos are copied to vimeo and youtube channels
- Laurent's first video has already had 11000 views in the last 2 years
- Try to keep maintenance to the minimum
- If you'd like to submit, propose or discuss a video please e-mail the documentation working group list: [geant4-docwg@cern.ch](mailto:geant4-docwg@cern.ch)
  - Assistance could also be provided for making the videos:
    - e.g. screen grabbing, adding text, sounds...
- As these are “official” videos it would be good if we could keep up to date – demonstrating new features and current releases
- We should do this!
  - There are already a lot of unofficial videos which might create a bad impression (if they don't work etc....)
