5.5 Insulation and Dielectric Breakdown III - Seminole C (15:30 - 17:30)

-Conveners: Jacob Stephens

time	[id] title	presenter
15:30	[1140] Characterizing breakdown voltage in micro-gaps with multiple field emitters at atmospheric pressure*	Dr FU, Yangyang
15:45	[606] Spatio-temporal dynamics of pulsed gas breakdown in microgaps	MENG, Guodong
16:00	[601] A pulse-sequence resolved study on evolution of streamer dynamics and discharge mode transition under repetitive frequency nanosecond pulses in high-pressure nitrogen	Mr ZHAO, Zheng
16:15	[1097] Buried Conductor Detection in The Seabed	SANABRIA, David
16:30	[1162] Investigation of Sterolithographic Laser Additive Manufacturing Resins for Pulsed Power Applications	BEATTIE-ROSSBERG, Robert
17:00	[635] Study on Insulation Characteristics Evolution of Oil-impregnated Paperboard under Mechanical Stress	Mr XIAO, Yao
