

# HSF Packaging Group: Introduction

---

Graeme Stewart and Ben Morgan

2018-06-13

# RSE2018 Conference Submission

- The abstract on packaging wasn't accepted
  - Neither was the general HSF talk...
- Abstracts now up:
  - Talks: <http://rse.ac.uk/conf2018/talk-abstracts/>
  - Posters: <http://rse.ac.uk/conf2018/poster-abstracts/>
- Ben still aims to attend
- Encourage your UK colleagues to attend as well!

# CERN Librarian and Integrators Workshop

- <https://indico.cern.ch/event/720948/>
- It was very useful to survey of all the CERN/LHC experiments, and summarise their tools and procedures
- Several key points relevant to this WG:
  - Time and manpower for packaging/integration work very limited
  - Main technical issue the tension between “reuse system packages” vs “build the world” vs “reproducibility”
- Potential contributions by Packaging WG in Graeme’s presentation

# Today's Meeting

1. Introduction
  2. Packaging Group R&Ds Discussion
  3. Test Drive Updates
- As ever, further contributions and updates are very welcome - just ask Graeme and me for a slot
  - Next meeting slot (27th June) not possible for Graeme/Ben. Tentatively propose 4th July, recognising it's not good for the US. Only topic so far is comments/review on WG presentation for CHEP2018.
