CERN procurement update

Thursday, 11 October 2018 09:50 (25 minutes)

This is an overview of status and plans for the procurements of compute/storage for CERN data centres and some recent adaptations to better benefit from technology trends. The talk will also cover our workflow for hardware repairs as well as status and plans of our ongoing efforts in establishing inventories for deployed assets and spare parts. It will also cover some recent hardware issues and how we are dealing with them.
