Cost and system performance modelling in WLCG and HSF: an update

Thursday, 11 October 2018 09:25 (25 minutes)

The HSF/WLCG cost and performance modeling working group was established in November 2017 and has since then achieved considerable progress in our understanding of the performance factors of the LHC applications, the estimation of the computing and storage resources and the cost of the infrastructure and its evolution for the WLCG sites. This contribution provides an update on the recent developments of the working group activities, with a special focus on the implications for computing sites.

Desired length

Primary authors: Dr SCIABÀ, Andrea (CERN); FLIX MOLINA, Jose (Centro de Investigaciones Energéti cas Medioambientales y Tecno); SCHULZ, Markus (CERN)

Presenter: Dr SCIABÀ, Andrea (CERN)

Session Classification: IT Facilities & Business Continuity

Track Classification: IT Facilities & Business Continuity
