## Good time with data: faas fn

*Wednesday 10 October 2018 09:35 (25 minutes)*

Presenting what is Function as a service (FaaS) and how it can be used in the data center. Will be showing how NERSC is using FaaS to get added functionality to the data we collect. Also presented will be some basic python on to perform these functions and how to connect to Elastic both natively and via the API.

### Desired length

20
