Tokyo Tier-2 Site Report

Tuesday 9 October 2018 10:00 (15 minutes)

The Tokyo regional analysis center located at International Center for Elementary Particle Physics in the University of Tokyo supports ATLAS VO as one of the WLCG Tier2 sites.
It provides 10,000 CPU cores and 10 PB disk storage including the local resource dedicated for the ATLAS-Japan member.
All hardware devices are supplied by the three years rental, and current contract will finish at the end of this year.
In this presentation, we will report the current status and updates on Tokyo Tier-2 operation and the prospect for the new system scheduled to be launched at the begging of 2019.
