

# Lustre-HSM binding

*Thursday, 22 April 2010 13:30 (30 minutes)*

Lustre-HSM binding is a collaborative effort between Sun and CEA.  
This presentation will introduce the first version of Lustre-HSM:  
HSM support model, its features, components, development status, and roadmap.  
It will also give examples of importing files from an existing HPSS namespace, archiving and restoring data,  
releasing disk space...

## Summary

Overview, design and features, status, use-cases, demo
