

CERN Lustre evaluation and storage outlook

Tuesday 20 April 2010 11:00 (30 minutes)

The CERN evaluation of Lustre as a potential solution for home directories, project space and physics storage has now completed. This experience will be presented along with outlook for bulk data storage and life cycle management in a capacity hungry and performance sensitive environment.

Authors: WIEBALCK, Arne (CERN); BELL, Tim (CERN)

Presenter: BELL, Tim (CERN)

Session Classification: Storage and Filesystems
