

# Report from EATM

Experimental Areas Technical Meeting

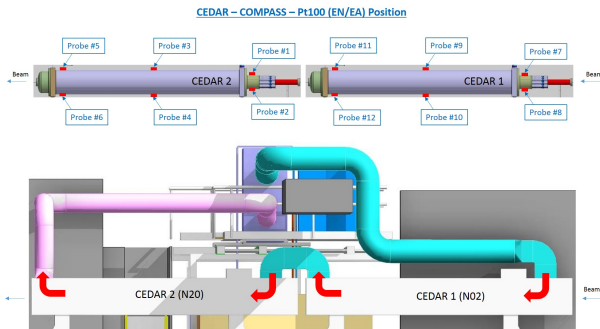

Tuesday, 05.06.2018

COMPASS TB meeting

Annika Vauth

- ▶ New beam permit procedure in EDMS this year: lost a day because it could not be put in “approval status” before Sunday. Procedure will be revised!
- ▶ EN-EA work on CEDARs: PT100 detectors installed

- ▶ North Area consolidation: budget cuts of almost 60%  
→ renovation of flammable gas detection in 888 postponed
- ▶ SPS schedule: longer MD, from 7h to 20h in week 40 and 43  
(beginning and end of October)
- ▶ EN-EA and BE-BI plan to form a new working group "BI WG"  
(instrumentation in secondary beams and transfer lines, members not yet assigned)
- ▶ EN-EA cabling workshop: setting up new contract framework.  
if we want to use their service, we should communicate it soon for their planning
