Constraining gluon PDFs and TMDs with quarkonium production

Wednesday 18 September 2019 16:55 (25 minutes)

We explore how the positivity of the P_T -integrated η_c -hadroproduction cross-section computed at NLO in α_s can set up constraints on the x dependence of both gluon PDFs and TMDs at low scales.

Authors: OZCELIK, Melih Arslan (Institut de Physique Nucleaire Orsay/Universite Paris-Sud/Unive); PISANO, Cristian (University and INFN Cagliari (Italy)); Dr ECHEVARRIA, Miguel (INFN Pavia); LANSBERG, Jean-Philippe (IPN Orsay, Paris Saclay U. / IN2P3-CNRS); SIGNORI, Andrea (Argonne National Laboratory)

Presenter: OZCELIK, Melih Arslan (Institut de Physique Nucleaire Orsay/Universite Paris-Sud/Unive)

Session Classification: Parallel 2

Track Classification: Small-x physics and heavy ions
