

« La nuit des particules »

The night of the particles

- Our public conference event will take place on Tuesday July 27 in the movie theater, « Le Grand Rex » located near the Opéra.
- Why should you come ?
 - Our distinguished colleague **Professor Michel Davier** will give a very interesting lecture for the general public (19H45) « Cosmos mysteries »
 - This evening is much more than the usual public conference! Two other sequences:
 - « Movies and science » 20h45-22h00 (see next slide)
 - A great feature film « Sunshine » , by Danny Boyle (the director of Slumdog Millionnaire) 22h15-0H00
 - The theater itself « Le Grand Rex » is quite worth a visit : it is one of the largest movie theater in Paris (2750 seats) and has a very special architecture both inside and outside!
 - It is **FREE ! Bring everybody!**
- The conference will be given in French but the movie « Sunshine » is in English !
- We gave ourselves quite a challenge : fill up a room of ~3000 people to spend an evening about particle physics. Success not guaranteed but it will be fun! Come and support us!

La nuit des particules

27 juillet 2010

Grand Rex - Paris 2^e

Métro Bonne Nouvelle

ENTRÉE LIBRE

19h30 - Conférence grand public

Ouverture au public à partir de 18h45

« Des particules au cosmos : les mystères des deux infinis »
par Michel Davier, académicien des sciences

20h45 - Soirée « Cinémascience »

avec des chercheurs, la participation exceptionnelle d'Irène Jacob
et la projection du film

Sunshine
de Danny Boyle

En partenariat avec le festival « Cinémascience » du CNRS

Plus d'infos sur : <http://nuitedsparticules.fr>

The sequence « Science and Movies »

- It will be divided in two parts:
 - A classical one : movies excerpts from « Angels and Demons » and « Sunshine » (a few minutes each) to trigger a debate with the public about :
 - Matter and antimatter
 - How does the Sun works
 - With the participation of our colleagues [Marie-Hélène Schune](#), [Gautier Hamel de Monchenault](#), [Pierre Antilogus](#)
 - A more unusual one : participation of two movies stars live : Irène Jacob and Pippo Delbono

IRENE and ALICE

- Irène Jacob, famous French movie actress, interpretation prize winner at Cannes movie festival, is the daughter of Maurice Jacob, our dear colleague from CERN who left us 3 years ago.
- Irène will speak about her scientific relationship with her father or how an actress sees particle physics
- She got so interested about this project that she wrote specially for us a short movie « Alice », directed by her friend and famous italian theater director and actor Pippo Delbono that will be projected for the first time.

July ,26

Pippo Delbono

- « Pippo Delbono is one of most important figures of the italian contemporary scene »

ICHEP 2010, G. Wormser July ,26

SUNSHINE

Sunshine, by Danny Boyle

The Sun is dimming and will soon become extinct; A crew is sent to re-ignite the Sun!

Conclusion

- Please all come along to « Le Grand Rex » with all your family and friends!
- More information on the ICHEP2010 web site « La nuit des particules » and <http://nuitdesparticules.fr>
- You should eat something beforehand (there will be a short pause at 10 pm during which you will be able to buy food and drinks but suppose there are really 3000 people)
- How to get there : line 1 to Concorde then line 8 direction Creteil, stop at Bonne Nouvelle (Good news!)
