## Exclusive Higgs production at the LHC

*Friday 23 July 2010 12:10 (17 minutes)*

After a brief description of the models of exclusive diffractive Higgs production, we first evaluate the theoretical uncertainties that affect the calculation of exclusive cross section (jets, Higgs...). In addition, in view of the recent measurement of exclusive dijet at CDF and the new implementation of the corresponding cross section in FPMC (Forward Physics Monte-Carlo), we developed an analysis strategy that can be used to narrow down these uncertainties with the help of early LHC measurement.

**Authors:** Ms DECHAMBRE, Alice (Universite de Liege); Mr STASZEWSKI, Rafal (SPP CEA Saclay and INP Polish Academy of Science); CHRISTOPHE, Royon (DAPNIA)

**Presenter:** CHRISTOPHE, Royon (DAPNIA)

**Session Classification:** 03 - Perturbative QCD, Jets and Diffractive Physics

**Track Classification:** 03 - Perturbative QCD, Jets and Diffractive Physics
