

TRD weekly meeting

week 23: 4 - 11 June 2018

- fill summary
- run 2 and run 3 equivalent tests
- to do

Alexander Borissov, Münster University, CERN, 11.06.2018

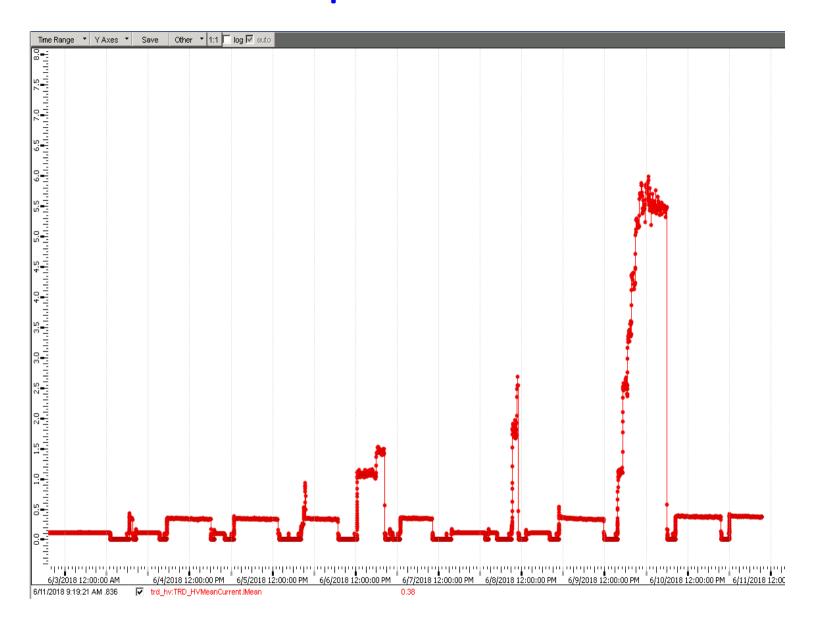

Fill summary

97.8% availability since Friday night at 23h!

Run 2 tests on 7/06/18, run 3 tests on 9/06/18.

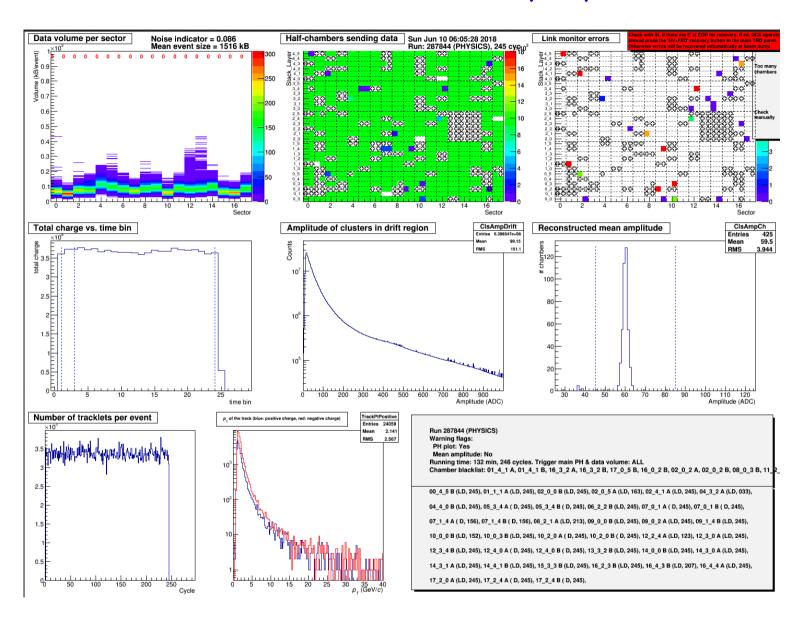

Run 2 and run 3 equivalent tests. TRD HV mean current:

- \longrightarrow Run 2 with 11, 15 Hz/ub: fully OK.
- \implies Run 3 with 30 70 Hz/ub: TRD at 70 Hz/ub during \sim 7 hours.

HV OK and was tuned, talk is planned. LMEs were observed, FEDs ERROR state

Run 287844, 10/06/2018

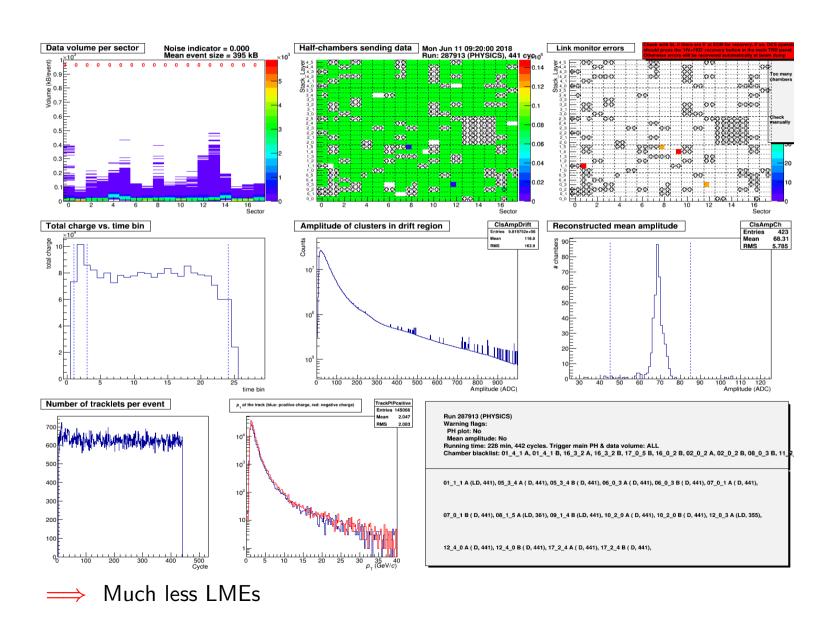

Many new LMEs.

Excluded chambers in ERROR state: 10-2-0, 12-4-0, 17-2-4, 5-0-4 and 5-3-4. Several other chambers have been recovered between the runs.

Run 287913 11/06/2018

10/06-11/06 between the fills: GTU DCS boards 08 17 were not responding, Guido 11/06/2018 \Longrightarrow Switched on the Corresponding power with the gtu-monitor in P2 was s witched on.

To do during MD and TS2

- recover excluded chambers
- perform nginject tests for chambers with LMEs and patching
- access, if needed.
