Central Exclusive Production at LHCb

Thursday, 13 December 2018 10:20 (20 minutes)

With installation of new shower counters (HERSCHEL) along the beampipe the sensitivity of the LHCb experiment to the central exclusive production (CEP) has significantly increased. And the dedicated triggers introduced in the early period of Run 2 allowed to extended dataset for the CEP measurements.

The talk will cover the CEP results of LHCb experiment during Run1 and Run2
