

Kolkata Tier II @ ALICE and Status

Site Name :-
 Tier-2 Site for the WLCG
 (World Wide Computing Grid)
 GOADB Name:- IN-DAE-VECC-02
 VO :- ALICE
 Group:- EHEPAG
 Unit:- VECC
 City:- KOLKATA
 Country :- INDIA

Kolkata,
 The capital of West Bengal
 Calcutta,
 Located in eastern India,
 known as the "City of Joy".
 Mother Teresa, Rabindranath
 Tagore, Satyajit Ray, J C Bose,
 and S N Bose

VECC Main Building

Team:-
 Subhasis Chattopadhyay
 Vikas Singhal
 Prasun Singh Roy

T. K. Samanta and S. K. Pal
 helped in establishing the centre
 in the initial years.

VECC, Variable Energy Cyclotron Centre,
 DAE, Department of Atomic Energy. Govt of India.

ALICE

Evolution of Grid Computing Facility at VECC

- 2002
- 2 Desktop Machine
 - 512MB HD in Desktop Machine
 - 128Kbps network shared link

- 2003
- 2 Tower Like Servers
 - 40GB as DAS
 - 512Kbps Network

- 2004
- 9 HP 1U Servers
 - 400GB in HP MSA 500
 - 2Mbps Dedicated Link

- 2009
- 8 Quad Core HP Blades
 - 25 TB i-SCSI storage
 - 100Mbps from VSNL (ERNET)

- 2008
- 40 Dual Core HP Blades
 - 108TB HP EVA SAN storage
 - 30Mbps WAN from Reliance

- 2006
- 17 Wipro 1U Servers Single Core
 - 2TB Wipro NAS storage
 - 4Mbps WAN Network from Bharti

- 2010 - 2012
- 32 Dual Processor Blades
 - 200TB IBM DS 5100 storage
 - 300 Mbps WAN from NKN
 - Cold aisle cooling solution
 - Efficient cooling (1.47 PUE)

- 2012 -2015
- GPU Computing with Tesla 2075
 - 1Gbps NKN WAN under LHCONE
 - 148 TB of disk based storage
 - Low cost storage solution based on EOS RAIN-6 concept.

- 2017-2018
- Xeon-phi co-processor for computing
 - 48 (2*14 Core) Dell Dense servers
 - 51TF cluster in TopSuperComputers
 - 10Gbps WAN network from NKN
 - 6 Million ALICE Jobs completed.

Evolution of Grid Computing Facility and Cooling Solution

2006

2008

2010

2012

2012 - now

Cooling Solution logical diagram

- Hot and Cool Air is separated via Cold Aisle Containment.
- Temperature gradient between Cold and Hot aisle is 5°C.
- Power usage effectiveness (PUE)
 - = Total Facility Power / IT Equipment Power
 - = 1200Units / 816Unit per Day
 - = 1.47
- Cooling solution reduced cooling power consumption by half.
- Management and monitoring of the server, storage is from outside Cold Aisle Containment.

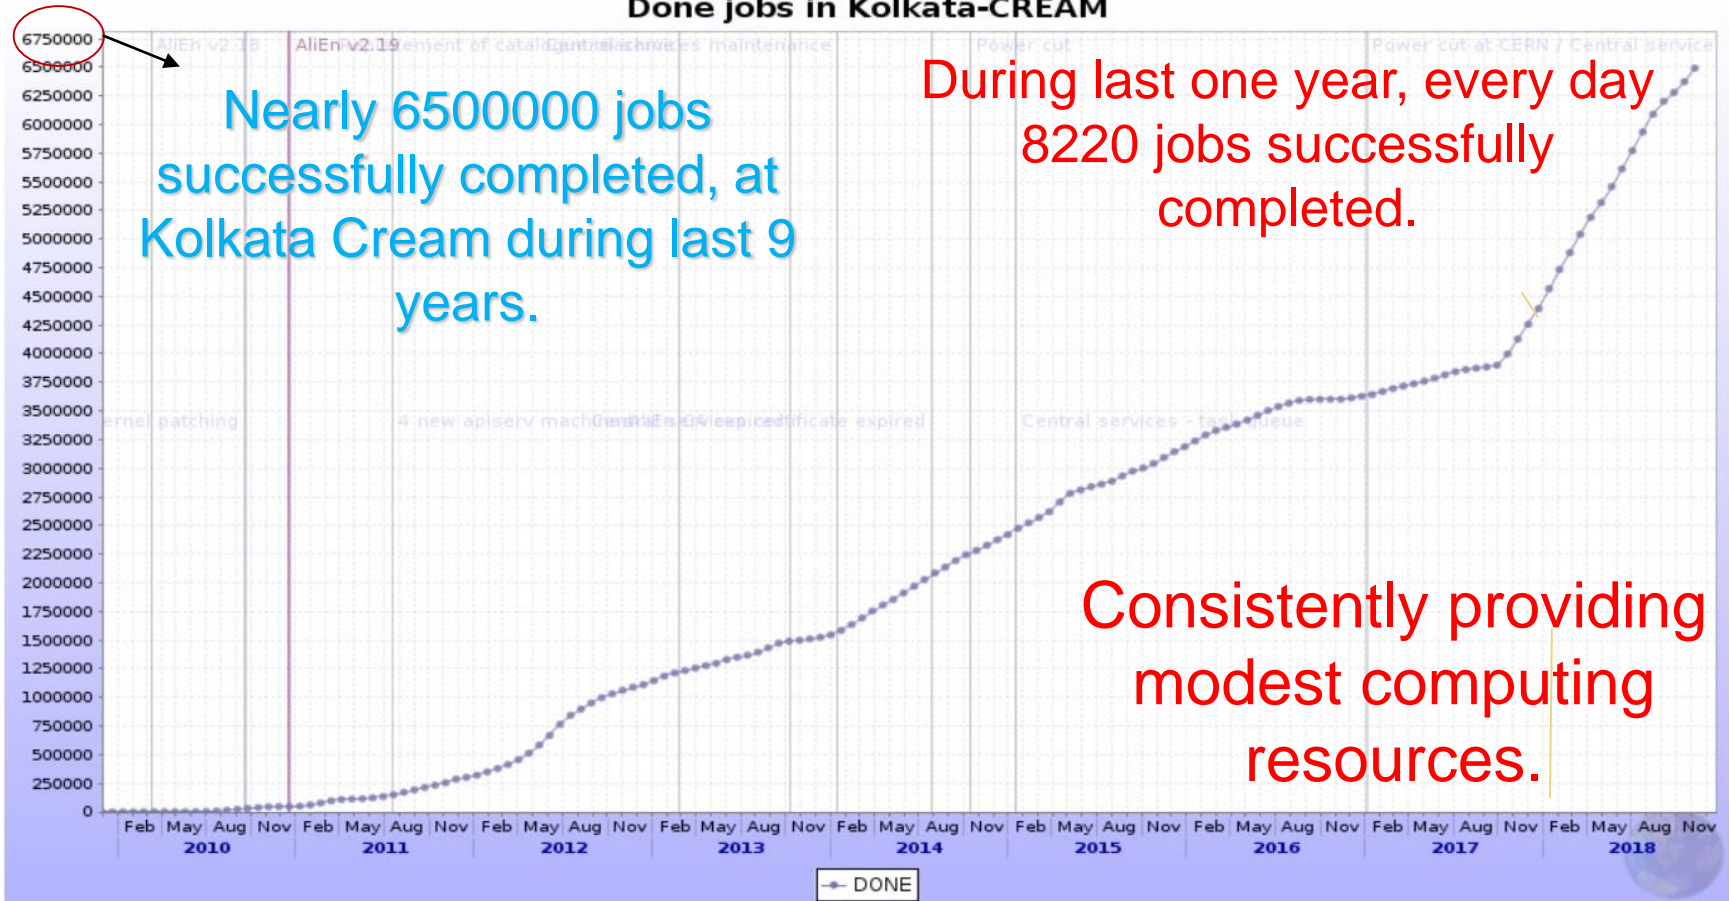

ALICE

KOLKATA Tier-2@Alice Grid

ALICE Job completed @Kolkata

Done jobs in Kolkata-CREAM

Consistently providing modest computing resources.

No AMC for Old servers.
Maintaining In-house only.
New resources have 5 years warranty.

Done jobs in Kolkata-CREAM				
Series	Last value	Min	Avg	Max
1 - DONE	6492620	289	2155324	6492620
Total	6492620		2155324	

24x7 Operation, 95% availability

Vikas Singhal, VECC, INDIA

ALICE

Commissioned 2688 HT cores of Computing Resources

- 12 DELL PowerEdge FX2 Enclosures.
- Each contain 4 DELL PowerEdge FC630 servers.
- Each server configuration:-
 - 2 Nos of Intel Xeon E5-2680 v4 2.4 GHz with 14 cores
 - 8 * 16 GB RDIMM, 2400MT/s
 - 960 GB of SSD harddisk.
 - 2 * 10 Gigabit network cards.
- Total cores $48*2*14*2=2688$ (HT)
- Scientific Linux CERN 6.8 installed
- 10G network connected.
- Approx cost of the equipment = \$ 300,000.
- Still running with PBS and Torque,
- Will Open-PBS work? Why to change?

ALICE

Kolkata Tier-2 cluster in TopSuperComputers India List

Top Super Computers in India is list of the most powerful supercomputers in India and it is maintained by C-DAC Bangalore. Earlier it was maintained by IISc Bangalore since its inception in 2009.

Listed in Top Super Computers India

<http://topsc.cdacb.in/jsps/feb2018/index.html>

<http://topsc.cdacb.in/jsps/july2018/index.html>

HPL Benchmarking performance

Theoretical Peak Performance

$$R_{peak} = 2.4 * 28 * 16 \text{ Gigaflop}$$

$$= 1075.2 \text{ Gigaflop}$$

$$= 1.0752 \text{ Teraflop (Single Server)}$$

$$R_{peak} \text{ for cluster} = 1.0752 * 48 \text{ Tflops}$$

$$= 51.6096 \text{ Tflops}$$

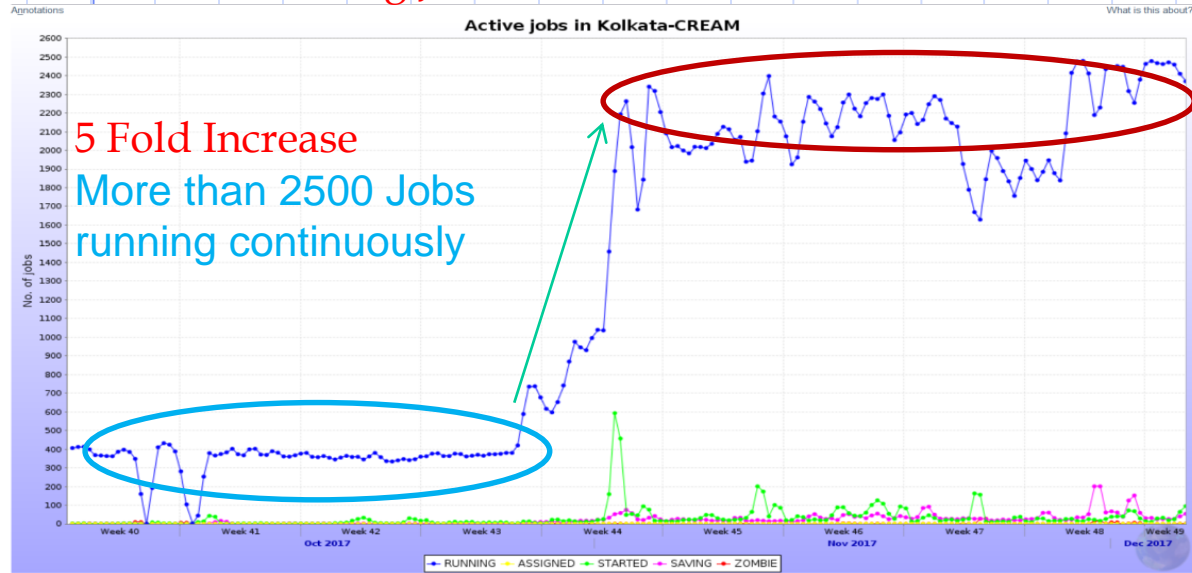

Linpack Benchmark performance

$$R_{max} = 4.30471e+04 \text{ Gflops}$$

$$= 43.0471 \text{ Tflops.}$$

Kolkata Tier-2 Cluster maintained its position in the list published in July 2018 also.

Running Jobs at Monalisa Oct - Nov 17

ALICE

Kolkata Tier-2 New EOS Storage

EOS looks cost effective, expandable storage solution

Procured new 8 DELL PowerEdge R730xd 2U Server

Used 7 such server for EOS.

Each contain:-

2 * Intel Xeon 10Core Processor

8 * 16 GB = 128GB DDR4 RAM

16 * 10TB NLSAS 3.5" 7.2K RPM HDD

2 * 480GB 2.5" SSD in RAID-1 for OS

4 * 10Gb SFP + based network card.

Price INR 55,00,000/- or USD 75,000/-

Raw Space = 160 TB in each server.

Total Raw Space = $7 * 160 = 1120$ TB

Usable space after RAIN-6 = $5 * 160 = 800$ TB

ALICE

KOLKATA Tier-2@Alice Grid

EOS Storage Solution

disk based, low latency storage solution based on RAIN-6

ALICE

Storage situation at Kolkata

Configured new 1PB of Storage with EOS Citrine version,
Trying to put under same name space

Existing Storage:- 174 TB Usable space

Kolkata::EOS (96TB usable but full now)

Based on the EOS Aqua-marine version.

Need to migrate to EOS Citrine version.

RAIN-6 Configuration between 3 FSTs.

Could not migrate to Citrine Version

Problem in connection between MQ and xrootd.

Presently can configure in 2 different name space.

Kolkata::SE (78 TB SAN Based storage but no hardware warranty. Probably need to fetch files from other replica.)

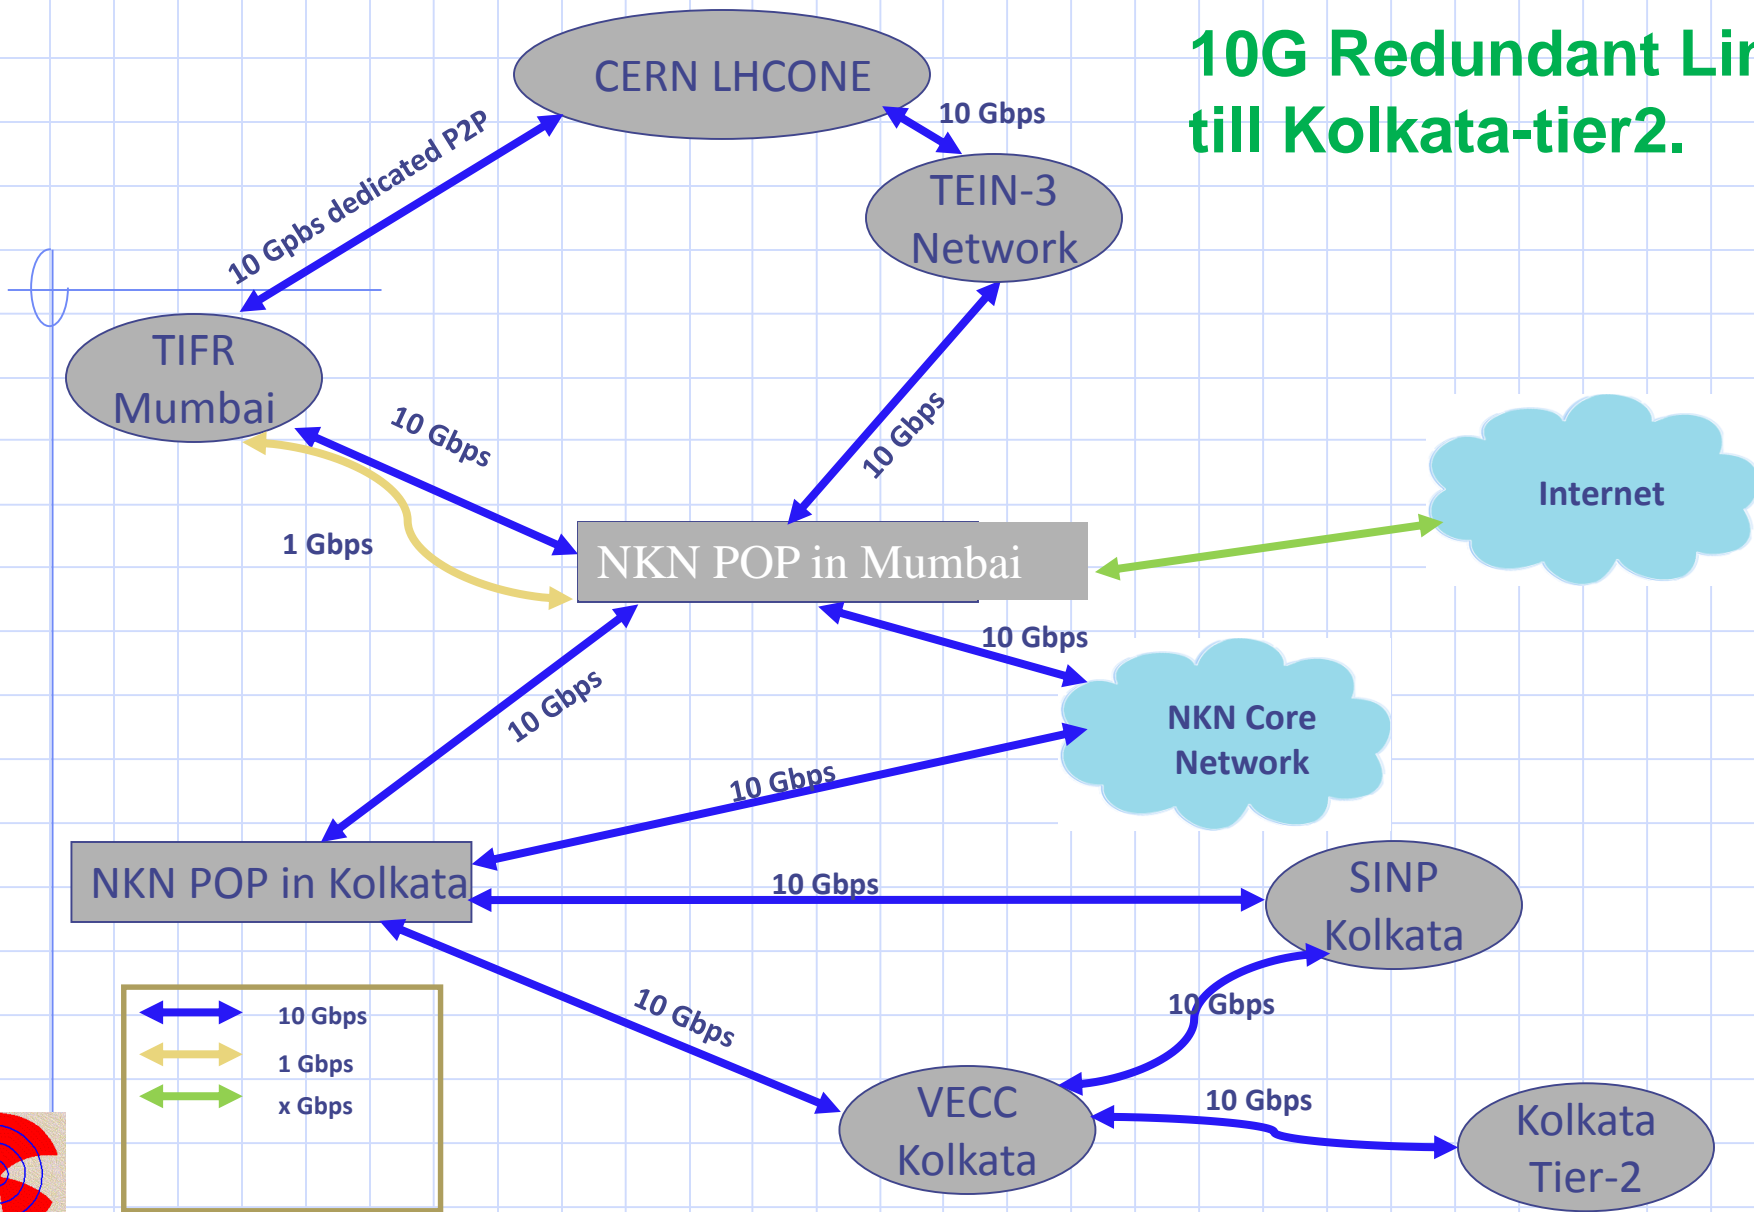

ALICE

KOLKATA Tier-2@Alice Grid

Physical Network Connectivity from CERN -- Kolkata, India

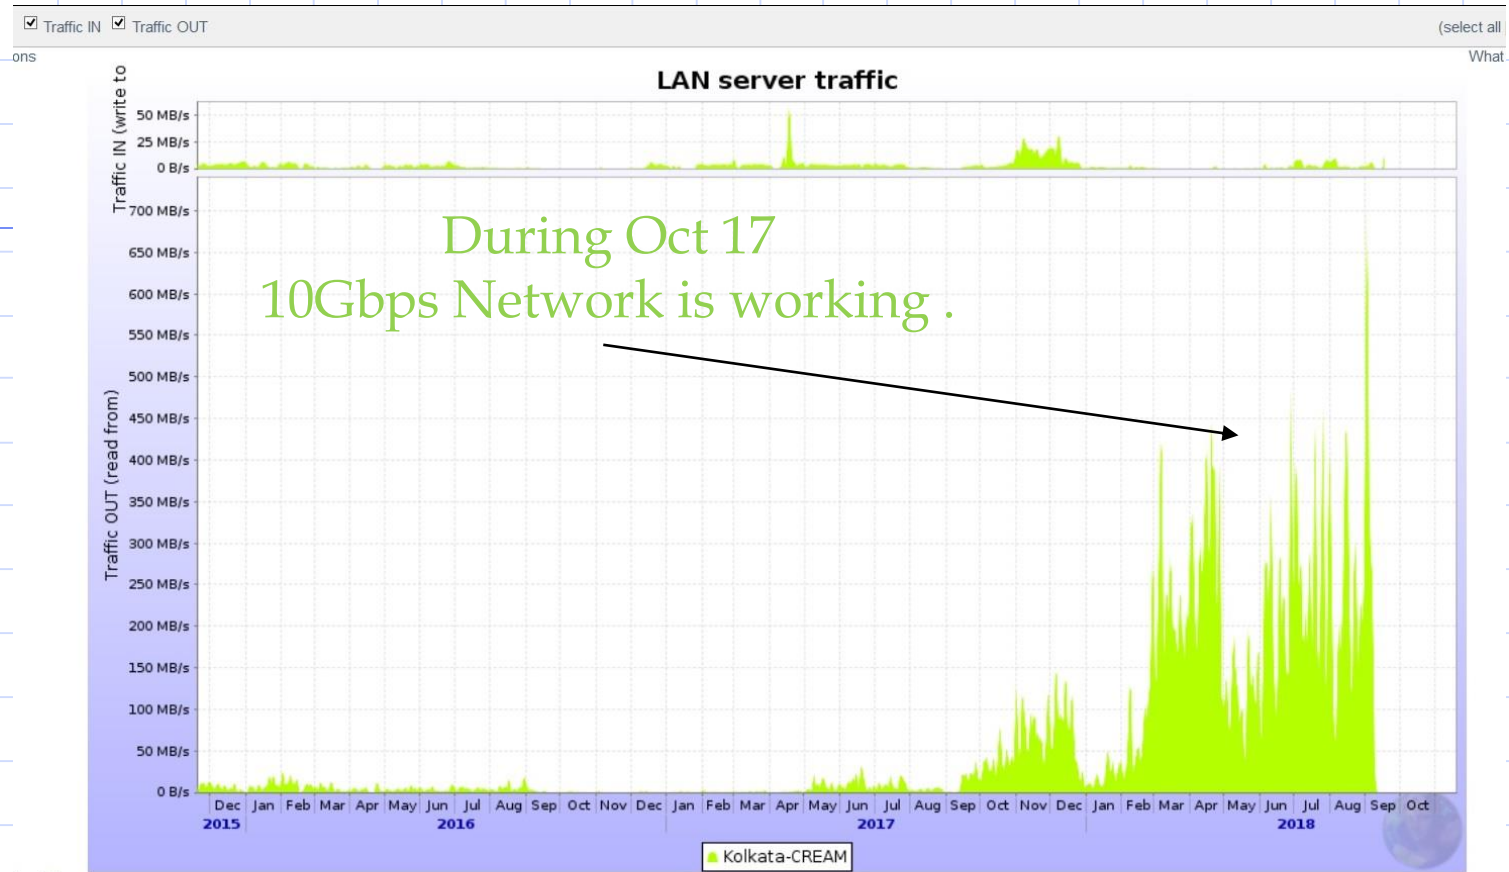

10G Redundant Link till Kolkata-tier2.

10G Network Utilization by Kolkata Tier-2

tics

Traffic IN

Series	Last value	Min	Avg	Max	Total
1. Kolkata-CREAM	11.9 MB/s	0 B/s	2.759 MB/s	655 MB/s	234.6 TB
Total	11.9 MB/s		2.759 MB/s		234.6 TB

Traffic OUT

Series	Last value	Min	Avg	Max	Total
1. Kolkata-CREAM	0.339 MB/s	0 B/s	56.46 MB/s	7.115 GB/s	4.69 PB
Total	0.339 MB/s		56.46 MB/s		4.69 PB

ALICE

Grid-Peer Tier-3 Cluster Status

- More Load on the CLUSTER as CBM user also utilizing the cluster
- 8 Numbers of HP BL675G7 Blade servers each with 4 * AMD Opteron Processor 6380(16 Core)
- 3 Number of Dell M610 Blade servers each with 2 * Intel Quad Core E5530 Xeon 2.4GHz CPU 8MB cache and 16GB RAM.
- 6 out of 8 HP blade servers are dedicated for non-interactive nodes and rest is being used for CBM work.
- 3 Dell blade servers are being used as interactive node.
- Extensively used by VECC users and PMD Collaborators, completed more than 35000 jobs successfully in last 3 months.
- 75 TB storage, almost filled up.
- 75 + active users (across India.)
- 45 + active users (in VECC.)
- Tape based backup of Tier-3 storage performed twice in a month.

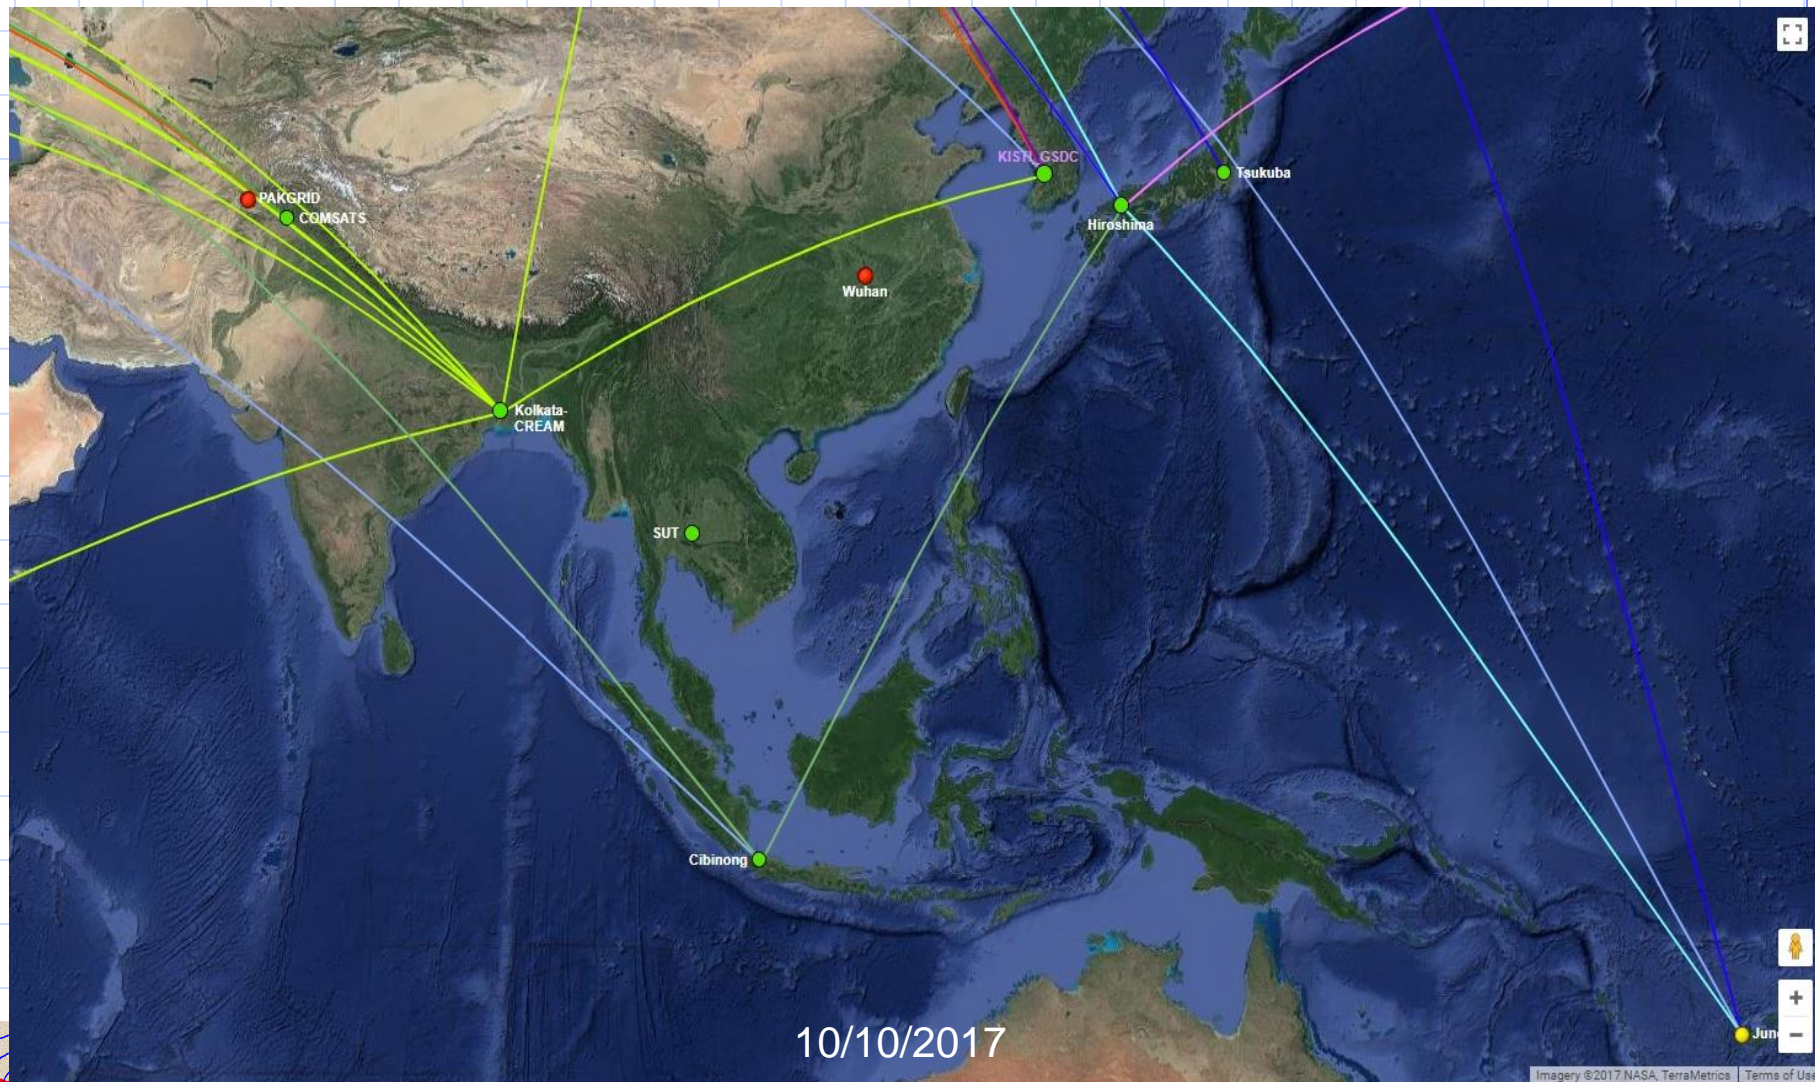

ALICE

KOLKATA Tier-2@Alice Grid

Connectivity between Asian Tiers

Not bad increasing day by day.

ALICE

KOLKATA Tier-2@Alice Grid

Future Road Map and Vision

For the huge data resources, using the low cost storage solution based on the EOS CERN.
Procuring the low cost storage boxes.

Started Procurement of 1.5 PB Of disk based storage servers

- Tentative with $18 * 12\text{TB} = 216\text{TB}$ in each and 7 such servers.

During Jan-Feb 19 we shall start procurement of 2 PB of disk based storage server.

During Jan-Feb 19 we shall start procurement of approx 20KHEP Spec Computing.

Accelerated or Heterogeneous Computing is new evolving field. (Participating at CBM @ FAIR in this direction).

Focus on High Throughput Computing (HTC) using of Accelerates like NVIDIA GPU, AMD, APU, Intel Co-processors.

Spreading knowledge on Parallel and Heterogeneous Computing.

ALICE

Thank You
