Discussion

- (Experience) Current situation in Asia concerning distributed storage: any implementation or a try to deploy distributed storages even in national-wiseW

- (Benefit) What is the goal of this distributed storage and its benefit to Asian sites? Benefit to experiments?

- (Requirement) What is the requirement of experiments for distributed storage? or what is the requirement of experiments for RUN3 and beyond in terms of storage?

- (Condition) What is the requirement of sites that they can join the distributed storage? (corresponds to the benefits to sites who join)

- (Constraint) Any constraints from sites for setting up distributed storage in technical/financial/political point of view?

- (Interest) Any volunteering sites for R&D purpose to join distributed storage? Additional resources, manpower could be required
