Your DAQ workshop

To: Gökhan N. ÜNEL, Cc: Robert Andrew McLaren, Seamus Hegarty

Dear Gokhan,

following from our discussion this morning on the possibility of having some financial support from EU funds, please refer to Robert and Seamus for the follow up.

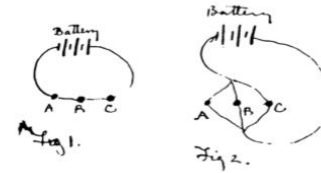

I fully support your initiative.

Cheers Livio

ISOTDAQ X

...the same problem, but you would have to proceed step by step. I think electricity would be the best thing to rely on.

Introduction to detectors
and detector readout

Let A, B, C be three keys or other points where the circuit may be open or closed. As in Fig. 1, there is a circuit only if all are closed; in Fig. 2 there is a circuit if any one is closed. This is like multiplication & addition in logic. (Peirce 1886, using his hand-drawn figures)
