

Mattias Wadenstein

- Manager of NDGF-T1 site
- Member of the GDB steering group
- From Umeå, Sweden
- Background as HPC sysadmin
 - Out of which the last 17 years in the grid world
- Keen interest in infrastructure for science
 - And cat pictures:

Vision for WLCG

- Engaging with the hard questions on how to do more computing with limited resources
 - Turning data into science at scale
- Welcoming new communities
 - Without abandoning the LHC experiments
 - Sharing facilities and infrastructure
 - Learning from best practices wherever they develop
- Evolving the infrastructure and governance
 - To adapt to a changing landscape
 - Finding a well-defined provider/user line in both aspects
 - Delivering the infrastructure that scientists need

Vision for the GDB

- The forum for the timescale between day to day operations and long term strategy (workshops, working groups, whitepapers)
- Help finding consensus between experiments and sites
- Exposing working groups to a wider audience for outside input
- Support the expansion towards new communities, welcoming new members
- Continue 1-2 Asian and add 1-2 North American meetings per year
- Continue the GDB steering group for valuable direction and support
