

Bonn-Gatchina analysis of the η -photoproduction reactions

Tuesday, 11 June 2019 15:00 (30 minutes)

We present the result of the combined analysis of the eta and eta-prime photoproduction data measured by A2,CB-ELSA and CLAS collaborations. The analysis confirms the existence of the $N(1895)1/2^-$ state and allowed us to define its properties with a good precision.

Primary author: SARANTSEV, Andrey (HISKP Uni-Bonn)

Presenter: SARANTSEV, Andrey (HISKP Uni-Bonn)

Session Classification: Parallel Session A

Track Classification: Baryon spectrum through meson photoproduction
