

Baryon decays and spectroscopy at BESIII

Wednesday, June 12, 2019 10:10 AM (35 minutes)

Based on the world's largest samples of J/ψ and ψ' events accumulated at the BESIII detector, the recent results on baryon decays and spectroscopy will be presented. Also the perspectives on the baryon spectroscopy at BESIII will be discussed.

Presenter: FANG, Shuangshi (Institute of High Energy physics)

Session Classification: Plenary Session 1
