

Flux expulsion experiments with QWR at RIKEN

Thursday, November 8, 2018 2:50 PM (10 minutes)

In each VT for QWR at RIKEN, we measure the vertical magnetic field at the upper part of the cavity. We report the obtained data, mainly at a moment the cavity shifts from NC to SC, and from SC to NC.

Presenter: UMEMORI, Kensei (KEK)

Session Classification: Flux expulsion efficiency
