

Flux expulsion experiments with QWR at RIKEN

Thursday 8 November 2018 14:50 (10 minutes)

In each VT for QWR at RIKEN, we measure the vertical magnetic field at the upper part of the cavity. We report the obtained data, mainly at a moment the cavity shifts from NC to SC, and from SC to NC.

Presenter: UMEMORI, Kensei (KEK)

Session Classification: Flux expulsion efficiency
