As a part of the KAIST Advanced Institute for Science-X (KAIX) program, we host an international forum, Light Dark World 2018. LDW2018 will focus on the most recent research trends in physics of the light new particles in both theoretical and experimental sides.

**Light Dark World International Forum 2018**

Light Dark World 2018 will bring together global experts from experiment and theory to discuss recent advances in the field of light new physics beyond the Standard Model, as well as develop new opportunities to study new light hypothetical particles, including light gauge bosons, light dark matter, axions and axion-like particles, sterile neutrinos and more.

**Organizing Committee**
- Brian Batell (Pittsburgh) - cochair
- Patrick deNiverville (IBS)
- Ahmed Ismail (Pittsburgh)
- Pyungwon Ko (KIAS)
- Hye-Sung Lee (KAIST) - cochair
