

10th International Workshop on Multiple Partonic Interactions at the LHC MPI@LHC 2018

Last edition resumé:

- 2:20 hours with talks of 15' + 1 overview talk of 20'
 - 1 theoretical overview
 - 1 talk by ATLAS
 - 1 talk by CMS
 - 2 talks by LHCb
 - 2 talks phenomenology

This year, if we have 3 hours, we can propose:

- 2 overview talks, 1 exp. and 1 theo. (20' + 20')
- 9 talks of 15' or 7 talks of 20'
or
- 2 overview talks, 1 exp. and 1 theo. (15' + 15')
- 10 talks of 15'
or
- 2 overview talks, 1 exp. and 1 theo. (15' + 15')
- 1 or 2 phenomenological talks (15' + 15')
- 8 or 9 talks of 15'

In principle we could plan 50% of theoretical talks and 50% of experimental ones.
