

Spontaneous SUSY breaking in natural GUT and axino LSP

Tuesday, 21 May 2019 16:20 (20 minutes)

In natural GUT, most of problems in SUSY GUT can be solved under natural assumption in which all interactions including higher dimensional interactions are introduced with $O(1)$ coefficients. Interestingly, small deviation from the complete natural GUT makes spontaneous SUSY breaking possible. We study the possibility that axino becomes the LSP in this scenario.
