

## Searches for sleptons with the ATLAS detector

*Tuesday 21 May 2019 15:30 (15 minutes)*

Many supersymmetry models feature gauginos and sleptons with masses less than a few hundred GeV. These can give rise to direct pair production rates at the LHC that can be observed in the data sample recorded by the ATLAS detector. The talk presents recent ATLAS results from searches for slepton pair production.

**Presenter:** CARRA, Sonia (Deutsches Elektronen-Synchrotron (DE))

**Session Classification:** Supersymmetry: Models, Phenomenology and Experimental Results

**Track Classification:** Supersymmetry: Models, Phenomenology and Experimental Results
