

## Search for Supersymmetry at the 100 TeV Future Circular Collider

*Wednesday, 22 May 2019 15:00 (15 minutes)*

The proposed 100 TeV pp collider (FCC-hh) is designed to collect a total luminosity of 20/ab providing an un-precedented discovery opportunity for physics beyond the Standard Model. This presentation focuses on the prospects for discovering supersymmetry at the future circular proton-proton collider.
