

New Benchmarks for MSSM Higgs-boson searches at the LHC

Wednesday, 22 May 2019 16:40 (20 minutes)

We present the recently developed benchmark scenarios for MSSM Higgs-boson searches at the LHC. They take into account the recently improved Higgs-boson mass calculations as well as the latest data from direct Higgs-boson searches and measurements of the 125 GeV Higgs boson. The different phenomenology of these scenarios is highlighted.
