About Myself

Full name : Tnourji Abdellah

My country : Morocco

Where am I studying : Marrakech , Cadi ayyad university

Field : High energy physics , Astronomic and computation physics (Master degree , first year)

I have done at CERN all sort of thinks : working on my project which is calculating missing transverse energy in PbPb collusion with CMS and learning new things about particle physics and engineering.
Department-Group: zh CMS

After CERN, I will going to look for an other opportunity to get back to CERN.

I like every think that CERN provided for us but what i do like the most is working with people of the same field different background and culture.
