

My name is Jeanine Shea and I am from the United States. I am currently working towards my bachelor's degree in Physics (and probably French) at Bucknell University in Lewisburg, Pennsylvania. At CERN, I have been working with the EN-EA department on beam tracking for the H4 Very Low Energy beamline. After CERN, I will complete my final year of undergraduate studies and then I hope to begin working towards a PhD in physics. Ideally, I would like to complete this PhD somewhere in Europe because of the amazing experience I have had at CERN interacting with people from all over the world and across so many different cultures.
