

Name: Cavan Day-Lewis

From: London, England

Study: University of Bristol, England

Field: Studying for an integrated masters in Physics

CERN group: CMS Experiment.

After CERN: I will try and go to Oktoberfest in Munich, before heading back to Bristol to finish my last year of university.

What have I enjoyed most so far: Andy Cohen's lecture series on field theory are up there, but most of all I have enjoyed meeting so many great people.
