Rivet monthly dev meeting

2 August 2018

Discussion topics

- Aim for these meetings monthly. This precedent ⇒ at ~start of each month

- 2.6.1 release
  - 5 months overdue! Many technical compatibility issues causing support load, e.g. OS X env
  - Code ~ready — several important fixes, incl since Lunga. AB to use DG validation code asap

- 3.0.0 release
  - So far overdue we've stopped counting!! Multi-weights etc., *needed* for HI workshop, 20 Aug
  - David G worked on this recently — nearly ready? Manpower is now… Chris P?

- Analysis coverage, advertising, arm-twisting, contrib mechanism
  - New coverage web pages, e.g. https://rivet.hepforge.org/rivet-coverage Used at tutorials!
  - Need to move code etc. to BitBucket — *after* releases. Can we use it for a better contrib?

- Paper plan? We planned a v3 paper and maybe an "annual statement"
