Combined Higgs boson measurements at the ATLAS experiment

Tuesday 9 April 2019 11:10 (25 minutes)

The most precise measurements of Higgs boson cross sections, using the framework of simplified template cross sections, are obtained from a combination of the measurements performed in the different Higgs boson decay channels. This talk presents the combined measurements, as well as their interpretation.

Author: JUSTE ROZAS, Aurelio (ICREA and IFAE (ES))

Presenter: TSUNO, Soshi (High Energy Accelerator Research Organization (JP))

Session Classification: WG3: Higgs and BSM Physics in Hadron Collisions

Track Classification: WG3: Higgs and BSM Physics in Hadron Collisions
