

GitLab use at CERN: keeping the illusion of a monorepo

Wednesday 3 October 2018 11:30 (10 minutes)

Overview on

- how we plan to migrate a huge SVN repository to GitLab (20+ MLOC, 1000+ products)
- how to keep the illusion of a monorepo among thousand of git repositories
- how to keep the code base coherent and clean
- how to administer thousand of projects
- how GitLab helps or does not help our use cases

Presenter: KOVARI, Zsolt (Ministere des affaires etrangeres et europeennes (FR))

Session Classification: Morning session
