

# ATLAS production @ OLCF. August 13, 2018

- 13,1M of events were delivered since 4 of August
  - «Backfill» works well, and already processed ~11,5M events.
  - ALCC:~1,6M events delivered. For the moment initial internal OLCF priority for ALCC submissions on a basic level, so workers spend more time waiting in the local queue
    - Going to make few experiments to finding optimal size of the submission

- A lot of ongoing activity with Yoda commissioning for Titan
