A Deep Dive into Progressive Web Apps

Wednesday 1 May 2019 14:30 (50 minutes)

Progressive Web Applications or PWAs in short, utilize modern Web Technologies to create cross-platform applications that offer the best of web and native user experiences.

This talk begins with the introduction of the PWAs, advantages over the legacy approaches and covers the core elements that define a PWA accompanied by examples with popular libraries like Angular, React and Vue.
