

Powering Tests & Magnet Training (20' + 10')

Wednesday, 30 January 2019 15:00 (30 minutes)

- Overview HW re-commissioning
- Did we become more efficient ?
- How to re-qualify circuits after interventions ?
- Magnet training campaigns: overview and results
- Will we be able to run at 7 TeV ?
- Will running at energies beyond 6.5 TeV as reliable or less reliable?

Presenter: MENTINK, Matthias (CERN)

Session Classification: Session 1: Overview of Run 2
