

LHC Dump Assembly –Operational Feedback and Future Prospective (15' + 10')

Thursday 31 January 2019 11:00 (25 minutes)

- What are the main evolutions of the system during Run 2? - What were the main limitations encountered and which limitations will remain for Run 3?
- What are the main changes foreseen and how will they impact machine operation?
- Can we reach 1.8E11 ppb in 1.8 um? If not, what mitigation measure is needed?

Presenter: PERILLO MARCONE, Antonio (CERN)

Session Classification: Session 3: Systems Overview
