

ADT and ObsBox

The first part will cover the history of the ADT and the ObsBox, followed by a summary of the operations during 2017-2018. Then it will focus on how our users interact with the system and discuss how they can get a better overview of what the system is actually doing.

The second part will cover the readiness and parameter space for run 3 followed by a summary of all the planned upgrades during LS2 while also presenting ideas for the future.

The last part will cover the re-commissioning strategy for the ADT.
