

Machine Protection System (20' + 10')

Thursday, 31 January 2019 15:00 (30 minutes)

- Have we been running the machine always safely during run 2 (normal & MD running)?
- Intensity ramp-ups: evolution during the run, issues found and time required
- Main failure cases encountered
- Experience with software/hardware interlocks

Presenter: WOLLMANN, Daniel (CERN)

Session Classification: Session 3: Systems Overview
