Dear All,

As you probably know, we had our yearly program of work meeting the last two days. An important outcome of this is a reorganization of the Department to be proposed to our Director as follows:

> Communication Systems – Jean-Michel Jouanigot
> Computing Facilities – Wayne Salter
> Database Services – Tony Cass
> Desktop and Internet Services – Christian Isnard
> Experiment Support – Jamie Shiers
> Grid Software & Deployment– Markus Schulz
> Platform and Engineering Services – Helge Meinhard
> Data and Storage Services – Alberto Pace
> User and Document Services – Tim Smith
> Departmental Infrastructure – Alan Silverman

Your current and future group leaders will be contacting you in the near future to clarify the implications.

Other topics discussed were ITIL, Security, Data Management, Identity Management, Virtualisation, External Hosting, Internal Mobility, IT Information Manager, Resources and EU projects. We expect to release a summary next week.

The date for implementation of those changes will be 1st January 2010.

Best regards,

Frédéric
