Enabling Grids for E-sciencE

- **Currently SAM merges several overlapping info sources when creating list of sites + services to test:**
  - OSG OIM
  - EGEE GOCDB
  - BDII
- **This has caused problems in the past**
  - Services flipping from one site to another
    - Impacts availability
    - Large operational load
- **Future:**
  - We only tests sites + services from GOCDB+OIM
  - Currently ~15% difference in #results
    - less in Nagios than SAM
