ATLAS results on $t\bar{t}H$

Saturday 24 August 2019 12:15 (25 minutes)

The measurement of Higgs boson production in association with a $t\bar{t}$ pair is essential to understand the top-quark couplings to the Higgs boson. This talk presents the analyses using Higgs boson decays to $b\bar{b}$ pairs, to multi-lepton final states (WW, ZZ, tau tau) and to a pair of photons, using pp collision data collected at 13 TeV.
