

# Educational Activities with the $\mu$ Cosmics detector

Antonios Leisos

Physics Laboratory, School of Science and Technology  
Hellenic Open University

8th International Conference on New  
Frontiers in Physics (ICNFP 2019)

## HELYCON and ASTRONEU Projects

$\mu$ Cosmics Detector

The  $\mu$ Net Project

Educational Activities

Near Future Plans

## HElIenic Lyceum Cosmic Observatories Network

HELYCON Station

3-4 plastic scintillator detectors

Local Coincidence, Relative Timing

Shower axis reconstruction with an accuracy of a few degrees.

Physics Laboratory

School of Science & Technology

Hellenic Open University

Helycon Detector Module

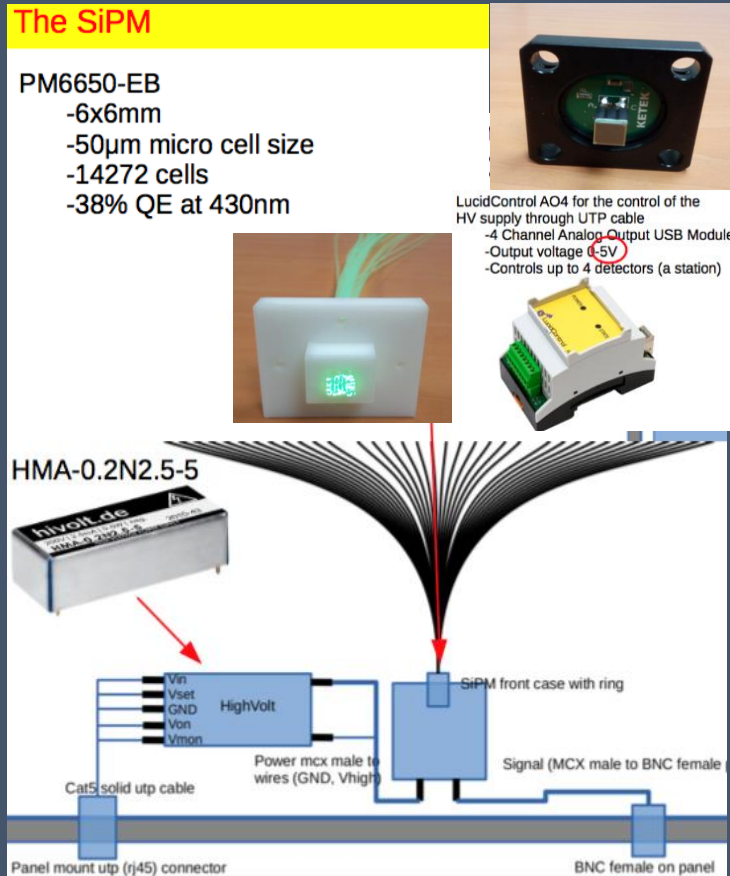

- Each station consists of
- 3 scintillator counters (~30 m spacing)
  - **RF antenna** (autonomous station)
  - **DAQ and Slow Control electronics**
  - Power Supply, Monitoring system

# The $\mu$ Cosmics Detector

## Integrated Detector

## Performance Studies

Threshold 20 mV (1 MIP)  
Timing @ 6 mV  
Median 6.5 deg  
236 per day, 10 per hour

## Quarknet DAQ

### Quarknet-Board

- 4 input channels with amplification.
- Time tagging is performed in one adjustable threshold.
- The time resolution for timing and ToT measurement is 1.25 ns.
- The trigger logic is based on the level of coincidence.
- It provides a trigger out signal
- It is operated through the USB port of the PC
- it is connected with an External GPS receiver.

## Hantek DAQ

### Hantek DSO3204A

- 1 Gsa/s acquisition rate
- 250 MHz Analog Bandwidth
- 4 input channels with amplification.
- It is operated through the USB port of the PC
- Full waveform digitization
- no GPS time-tagging.
- No trigger out

## $\mu$ Net

5  $\mu$ Cosmics Detectors  
deployed at  
High Schools of Patras

15 months duration

Educational Tools

Educational Activities

Training

Feedback and Evaluation

### Detector Array

Construction

Calibration

Deployment and  
Operation at school

Deployment at 5  
High Schools of Patras

2 station in adjacent  
schools for double station  
coincidence studies

### Research Team (RT)

1 Faculty member

1 Post Doc Researcher

1 PhD Student

### Educational Activities

Detector Unit Assembly

Response Calibration

Timing Synchronization

Muon Telescope

Operation & Monitoring

Station-Geometry Study

Data Analysis

### Educational Tools

Offline & Online  
Software

Educational Material and  
MOOCS

Manuals & Questionnaires

### Training

Distant Learning

Top Down approach  
(RT  $\rightarrow$  Teachers  $\rightarrow$  Students)

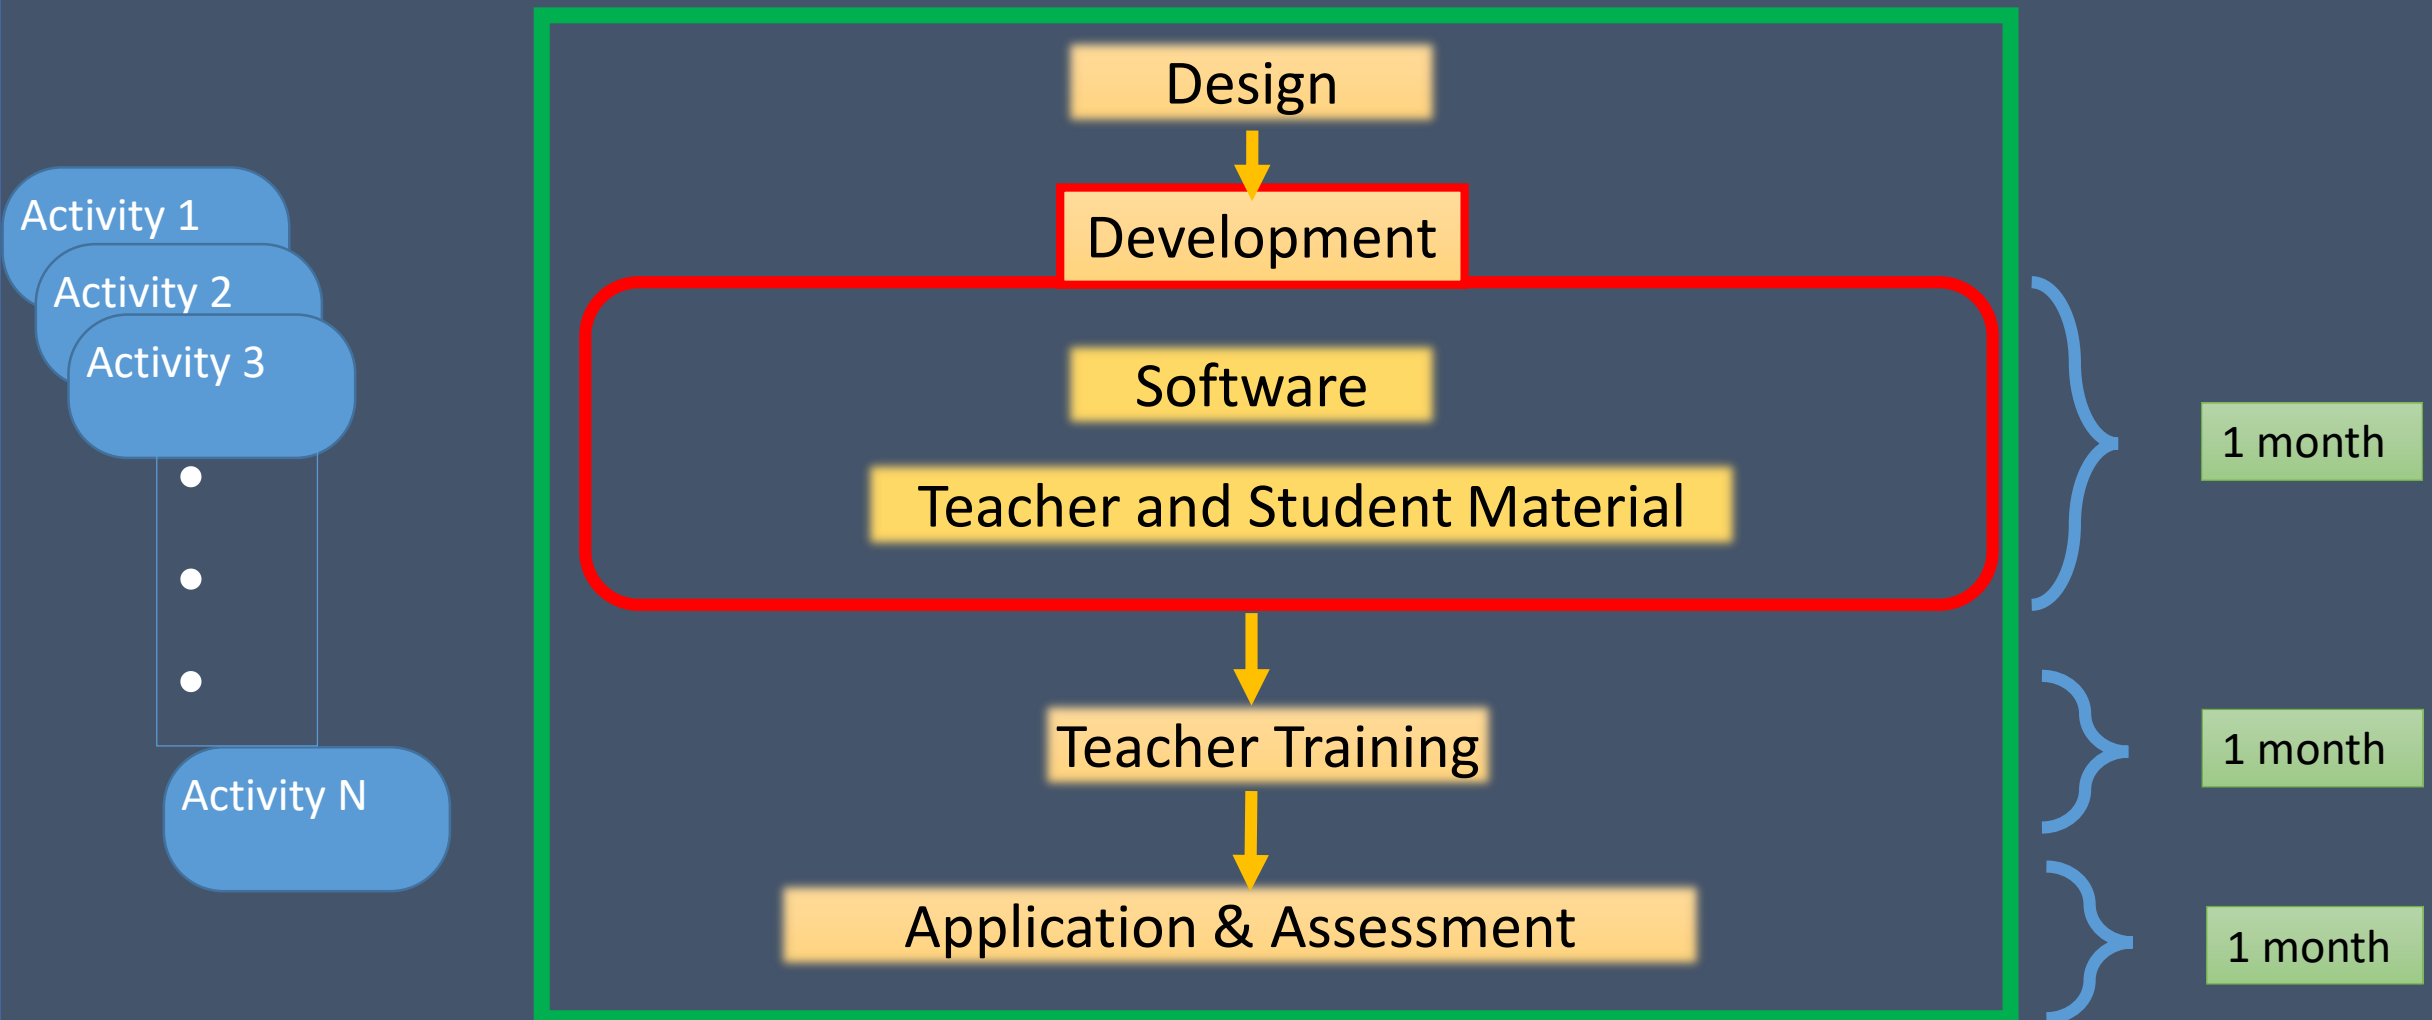

### Feedback and Evaluation

Online Meetings

Discussion Forum

Approved Project

## Educational Activity Life-Cycle

## Schedule

Detector  
Construction  
& Testing

1-5

Development  
of Educational  
Activities

Application of  
Educational  
Activities

6-12

Evaluation  
and  
Conclusions

12-15

Time (months)

## Detector Assembly

Scintillator Cleaning  
Tyvek Cut

Tile Positioning  
WLS fibers insertion  
Tyvek positioning

## Detector Assembly

Connectors positioning  
SiPM attachment

Light Proofing

Final Test  
Dark Current measurement

## Detector Calibration

Experimental Setup

Principle of operation

Data acquisition

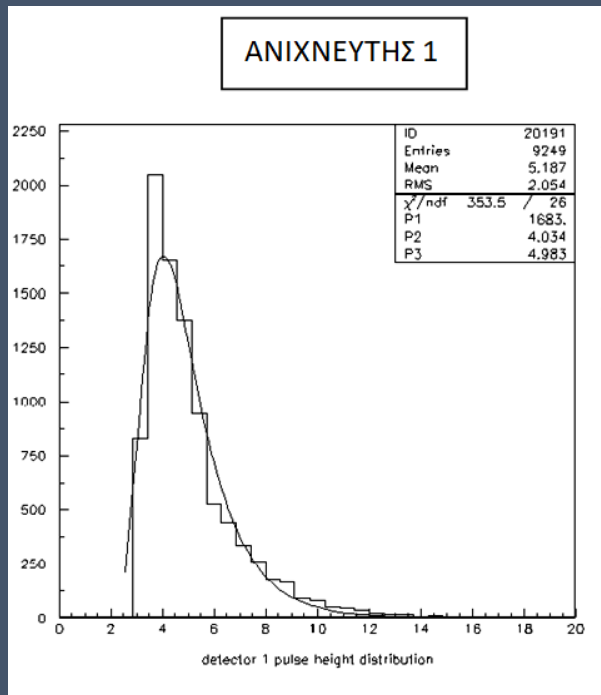

## Detector Calibration

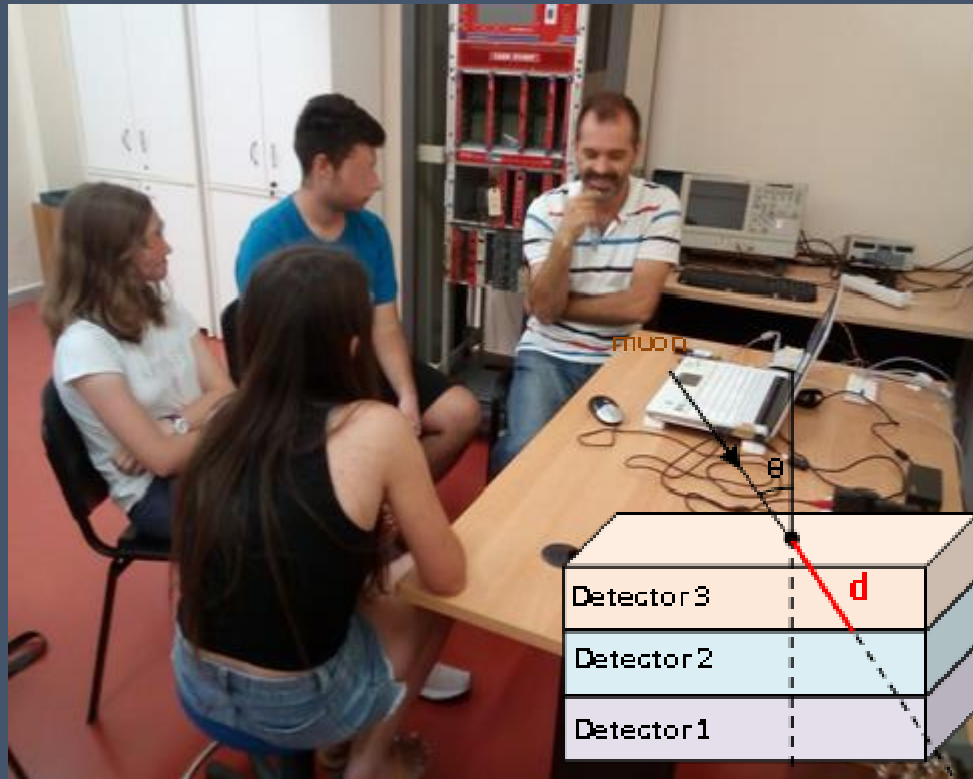

Data Analysis

Calibration Curve

Computation

## Detector Timing Synchronization

Time Offset

Slewing Correction

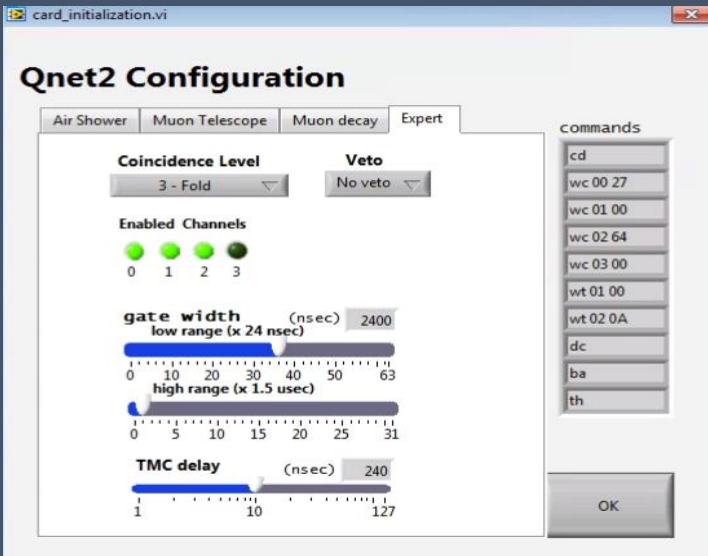

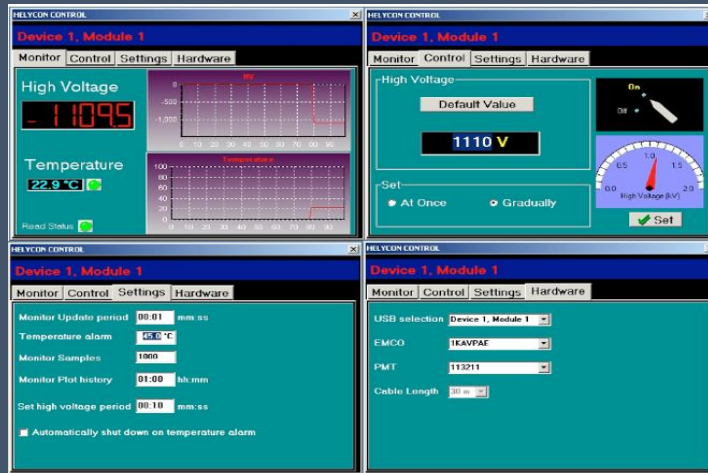

## Muon Telescope

## Geometry Studies

## DAQ-Data Quality Monitoring

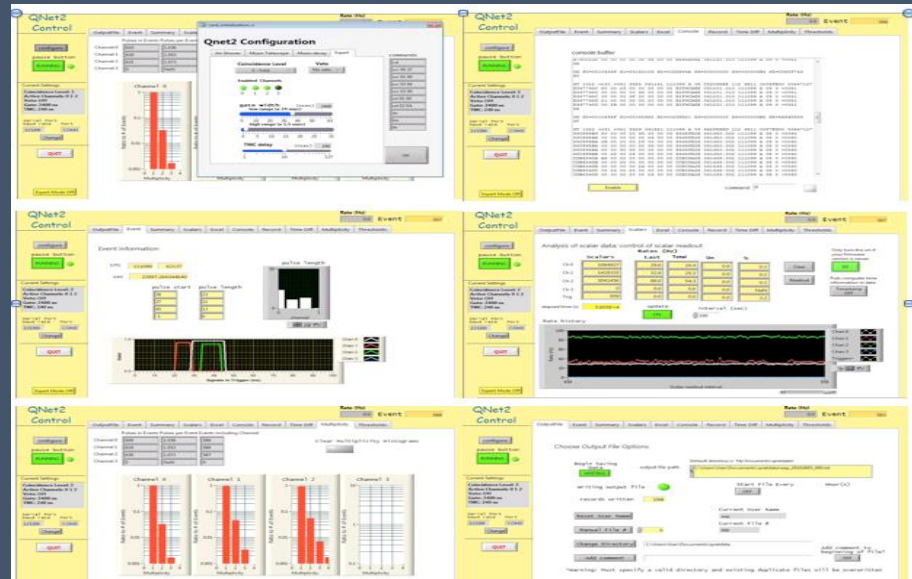

Temperature

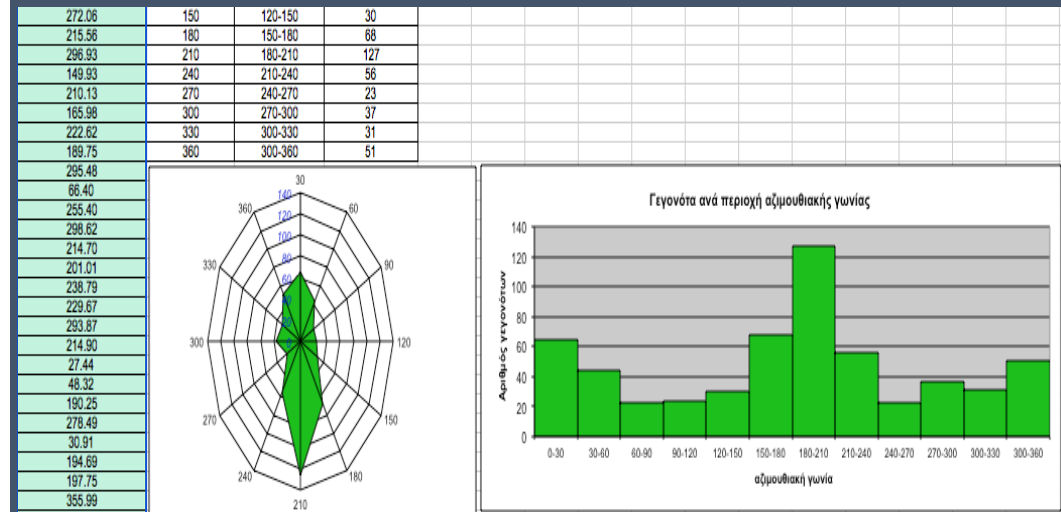

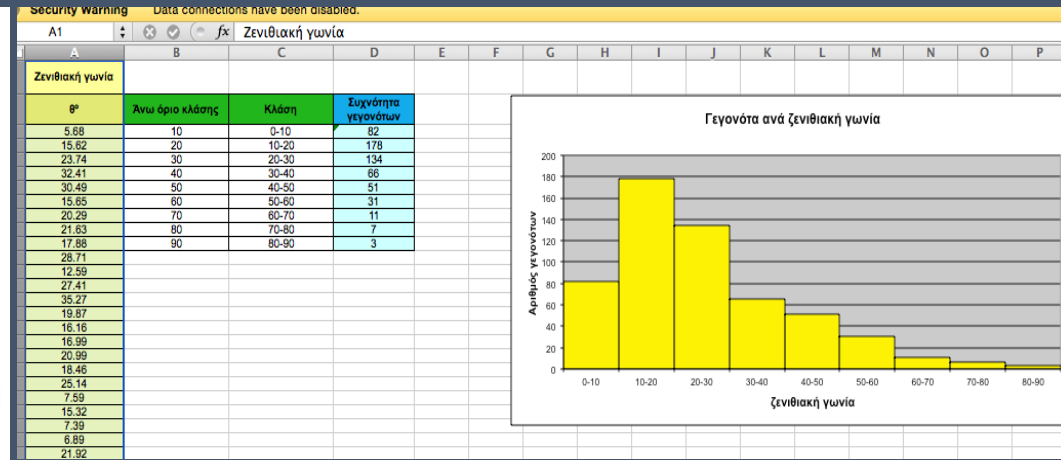

Pressure (mbar)

Time (s)

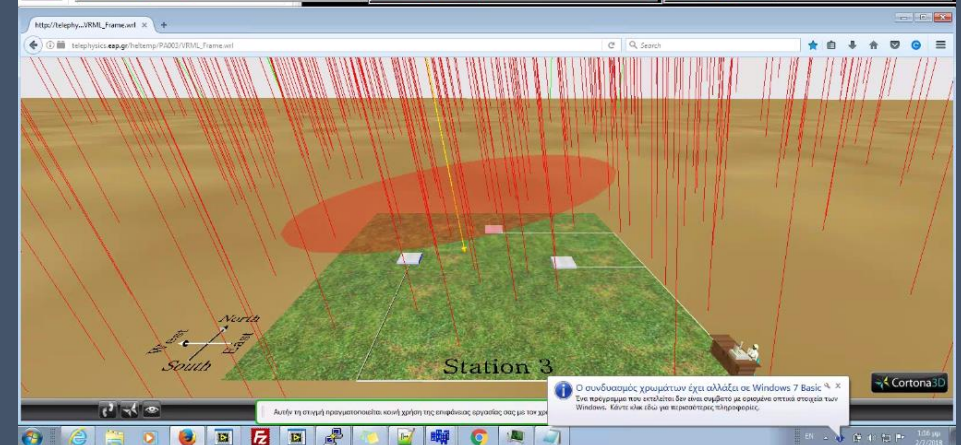

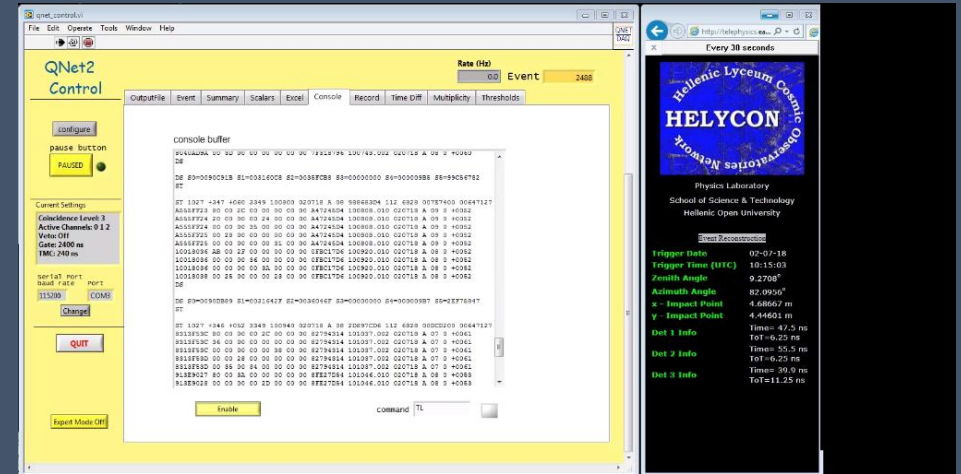

## Shower Reconstruction-Data Analysis

## Remote operation of an Astroneu station

Complete set of educational material

- Physics of cosmic rays
- Architecture of a Helycon station
- Step by step instructional manual
  - Setting of operational parameters
  - DAQ, Control and Monitoring
  - Data analysis
- Evaluation tests and exercises

Astroparticle physics summer schools for students from Achaia

1<sup>st</sup> summer school (2018)

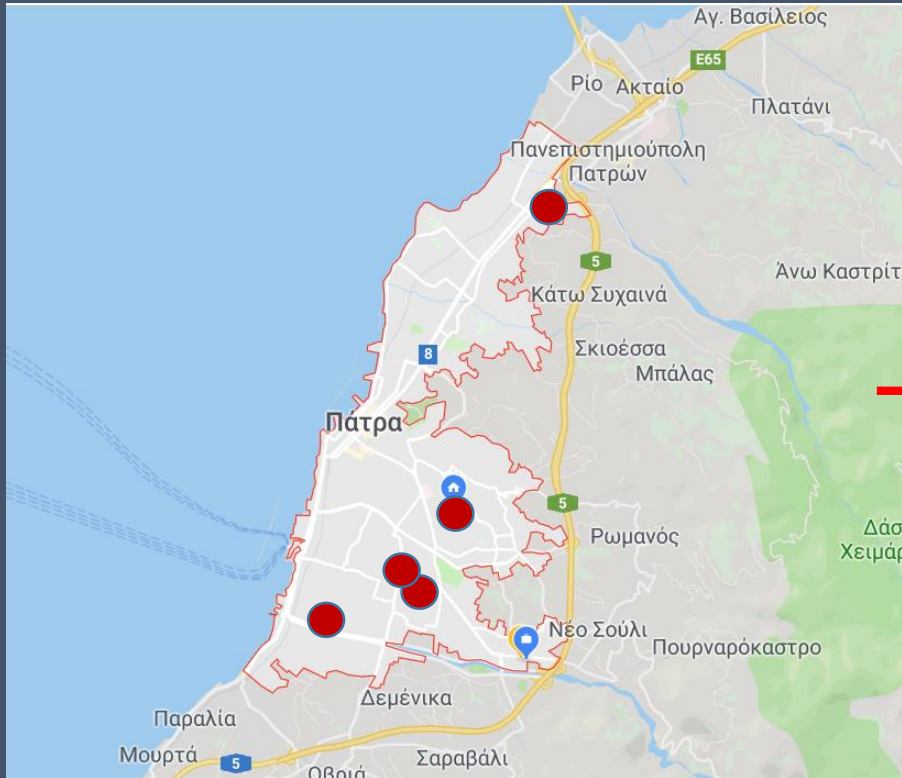

2<sup>nd</sup> summer school (2019)

## Installation of $\mu$ Cosmics detectors

$\mu$ Net project (5 detectors)

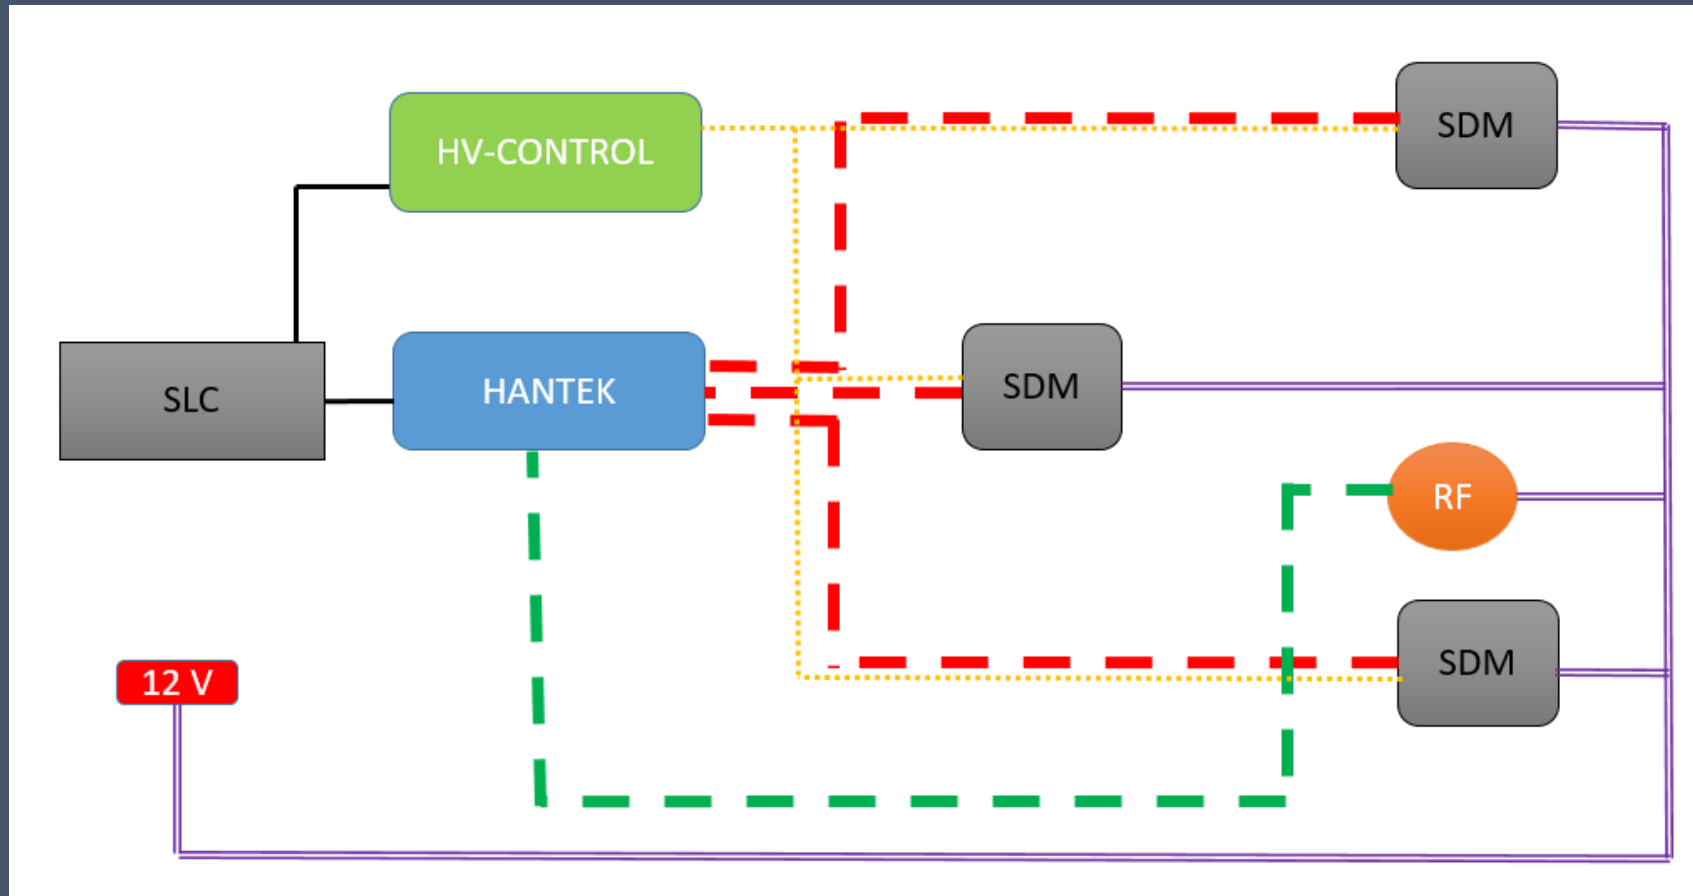

3 more detectors outside Achaia  
(Zakynthos, Tripoli, Athens)

By end of 2019

μCosmics II: Upgraded μCosmics with RF antenna

- RG58-PMT SDM Signal
- RG58-EW RF Signal
- UTP Control Voltage
- UTP Power
- USB

The  $\mu$ Cosmics Detector is suitable as a school EAS detector

The 1<sup>st</sup> array of educational air shower detectors in Greece is under construction ( $\mu$ Net)

A complete set of educational activities and educational material will be available through the  $\mu$ Net project

Increasing interest for the  $\mu$ Cosmics detector as well as for the remote operation of an Astroneu station

Design of educational hybrid arrays (particle detectors and RF antennas)
