

# ATLAS production @ OLCF. August 2018

- 31,2M of events were delivered in August
- «Backfill» ~21,3M Events (12,8M Titan core\*hours consumed)
- ALCC:~9,8M events delivered (2,9M Titan core\*hours).
- Lustre issues at the and of August, affects us only because «freezing» of queues, and we didn't lost any significant data

# ATLAS production @ OLCF. September 10, 2018

- 7,5M of events were delivered in September (not so great, but seems some post effects after FS failure)
- «Backfill» ~5,2M Events (3,6M Titan core\*hours consumed)
- ALCC:~2,3M events delivered (0,8M Titan core\*hours)
  - Continue to tune manually size of submission (decreasing to 600 nodes didn't increase throughput, 1200 nodes as limit were set recently)
