

# **CRISTAL: a distributed control and acquisition system**

*Friday 21 September 2018 15:20 (10 minutes)*

At the CRIS experiment at ISOLDE, a Python-based distributed control and acquisition system has been developed that allows for fast expansion of any new device and feature. It will be briefly presented.

**Presenter:** DE GROOTE, Ruben Pieter (University of Jyvaskyla (FI))

**Session Classification:** Laser Control System
