=====

Site-specific issues:

1) 9/7: BNL - destination file transfer errors ("Transfer failed to fork, check fts3server.log for more details..."). Errors stopped, but not clear what the problem was. https://ggus.eu/?mode=ticket_info&ticket_id=137074 was closed on 9/11 - eLog 66748.

Follow-ups from earlier reports:

(i) 8/29: SWT2_CPB - file transfer errors ("Has trouble with canonical path. Cannot access it"). https://ggus.eu/?mode=ticket_info&ticket_id=136930 in progress, eLog 66607. Update 9/12: the two issues involved in this ticket were resolved. Recent file transfer and deletion efficiencies good - closed ggus 136930. eLog 66758.

(ii) 8/29: NET2 - destination file transfer errors ("Communication error on send, err: [SE][srmRm] httpg://atlas.bu.edu:8443/srm/v2/server: CGI-gSOAP running on fts301.usatlas.bnl.gov reports Error reading token data header: Connection closed"). https://ggus.eu/?mode=ticket_info&ticket_id=136936 in progress, eLog 66612.
