CVMFS at Compute Canada

Monday 3 June 2019 15:10 (20 minutes)

This talk will present the activities and developments at Compute Canada related to CVMFS and publication and management of research software and data, including topics such as availability and resiliency considerations for globally-accessible repositories, collaboration and coordination challenges that can arise when different organizations use each other's repositories, and container image distribution in an experimental Kubernetes cluster at the University of Victoria.

Presenter: TAYLOR, Ryan (University of Victoria (CA))

Session Classification: User Stories
