M3Or3B-01: Development of MgB₂ superconductor wire and magnets for DC and AC applications

Wednesday, July 24, 2019 2:00 PM (15 minutes)

Hyper Tech Research will report on progress towards developing magnesium diboride superconductor wires, coils and magnets for commercialization efforts, with a specific emphasis on conduction cooled MRI and AC motor/generator applications.

Primary authors: Mr TOMSIC, Michael (Hyper Tech Research); RINDFLEISCH, Matthew; PENG, Xuan (Hyper Tech Research Inc.); DOLL, David (Hypertech); SUMPTION, Mike (The Ohio State University); Dr COLLINGS, Edward (The Ohio State University); WAN, Fang (The Ohio State University); ZHANG, Danlu (The Ohio State University)

Presenter: PENG, Xuan (Hyper Tech Research Inc.)

Session Classification: M3Or3B - MgB₂ and Fe-based Wires
